Office Action Summary

Application/Control Number: 09/779,213

Art Unit: 2834

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 and 8 rejected under 35 U.S.C. 102(a) as being anticipated by Takayama, Yuhara or Kimura.

Claim 2 rejected under 35 U.S.C. 102(a) as being anticipated by Kimura.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3-7 and 9 rejected under 35 U.S.C. 103(a) as being unpatentable over Takayama,

Yuhara or Kimura.

Each reference teaches a piezo electric substrate with an electrode layer having a top layer of aluminum over another layer. Note that "capable of reacting---" is not considered as a limitation that restricts the materials used, over time, anything can be "capable of". Note Kimura specifically uses Al over Ti (one of applicants specific examples). The references don't teach certain specific dimensions or substrate materials. However, optimization of a known device via appropriate selection from among known materials and providing specific dimensions are within

Art Unit: 2834

the skill expected of the routineer and would therefore have been obvious to one of ordinary skill in the art.
